

Semi-Automatic™ Weighing & Labeling Station

The **Semi-Automatic™ Weighing & Labeling Station**, operating in the Microsoft Windows environment, allows users to achieve optimal performance in highly abusive environments. The touch screen functionality coupled with scale, scale indicator and label printer offers precise weighing and labeling for any production environment.

Manufactured out of the highest quality stainless steel, the **Semi-Automatic™ Weighing & Labeling Station** provides durability that out lasts the competition. Our engineers construct everything with the utmost quality in mind.

Process Integration offers this system for use with various different types of products.

Available with a multitude of configurations such as custom PC hardware, customer selected scales, scale indicators and label printers.

Process Integration also offers customized user interfaces and software to deliver increased efficiency when weighing, pricing and labeling products for distribution.
